

Prior Learning:

In Year Two, the children will learn to use technology safely and respectfully and keep personal information private. They will identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.

Key Computing Knowledge: *The children will learn about internet safety through accessing the childnet website and Be Smart with a Heart videos and activities.*

- The internet can be unsafe if not used correctly. I know that to stay safe on the internet I must be aware that;
- **Safe** - keeping personal information safe. Do not share your full name, password, school or home address.
- **Meet** - Meeting someone you do not know can be dangerous - even if you they are a friend of a friend or say they are someone else. You must tell an adult if someone you have met online asks to meet you or for photos and videos of you.
- **Accepting** - Think before you click. Do not click on anything if you are unsure who sent it or what it is that has been sent.
- **Reliable** - You cannot trust everything you see online. Compare several websites before deciding if something is true.
- **Tell** - tell a trusted adult if something or someone ever makes you upset on line.
- **Heart**- always be kind and respectful to other online.

Software/Hardware Resources	Key Computing Vocabulary	
<ul style="list-style-type: none"> ✓ iPads ✓ laptops ✓ https://www.childnet.com/young-people/primary/get-smart 	internet safety	The term used for staying safe when using the internet. Harm can be emotional and caused by friends as well as potential physical harm posed by strangers.
	personal information	Information about yourself such as your name, address, phone number and the school you attend.
	password	A mixture of letters, numbers and symbols which will allow the user access to a electronic device or an online account. Passwords should not be shared.
	sharing	Sharing information online means giving information to other people or businesses. Shared information maybe available to the public unless sharing settings are used, which allows the user to decide what happens to their information.
	online	Being online means being connected to the internet via a device such as a phone, tablet or laptop.
	trusted adult	A trusted adult is someone who is able to protect a child and follow safeguarding procedures. It is usually a parent or teacher.
	respectful	Being respectful online is being kind and considerate and not doing anything whilst online that may harm someone or cause them to worry.

Computing Outcomes	Cross Curricular Links
The children will produce posters or leaflets to show their understanding of the SMART rules at the end of the unit.	<p>Art: Designing, drawing and decorating posters and leaflets.</p> <p>PSHE: Discussing issues about internet safety that might be worrying the children, such as online bullying and peer group pressures.</p>
